

# The LADDER M8rix Professional

This is an anti-slip device that can be used on most hazardous exterior surfaces such as grass, oily concrete, tarmac, decking, paving slabs, gravel, snow and even solid ice.

The reason it boasts that it can go on all these surfaces is because of the unique 2000 pin base that engages the surface. The top of the Ladder M8rix Professional has an industrial rubber grip with a shoulder to rest the ladder against.
